ZBROJOVKA ZTM DEFEND

VESTS FOR BOTH (CONSEALED AND OUTER) WEARING

SENATOR SP

SENATOR SPOL

SENATOR ST

The bullet-proof vests of the SENATOR - DIPLOMAT line are, with the exception of the DIPLOMAT SPOL vest, designed especially for concealed wearing by persons who cannot wear the vest on the clothes due to the nature and the way of pursuit of their profession.

These vests are produced according to the CSN 39 5360 standard in the ballistic resistance classes 1,2,2CZ, 3 and 4 or according to the US STD NU 0101.3 in the classes I, II.A, II and IIIA

VESTS FOR OUTER WEARING

MARSHAL LE

MARSHAL TE

MARSHAL ST

Bullet-proof vests intended first for police or members of security agencies . They are finished for free move by runing, walking , shooting , or by driving . The construction of the vest makes possible in case of the need increasing of the ballistic resistance with the help of the inserting of the ceramic boards . The boards are inserted in front but also back part of the vest.

The vests are produced in according to ČSN 39 5360 in categories of ballistic protection1, 2, 2CZ, 3 a 4 and with ceramic board in categories 3CZ, 4CZ, 5, 5CZ, 6, 6CZ, 7 a 7CZ.In according to US standard are produced the vests in categories I, IIA, II a IIIA with ceramic board in categories III a IV.

COMMANDO LE

COMMANDO TE TAKTIK

COMMANDO SP

COMMANDO ANTI-SPLINTER

Similarly to the bullet-proof vests for the police, the military vests are intended for outer wearing. The outer cover of the vest has a camouflage print or is in khaki colour. Thanks to its design the vest enables the wearer a comfortable wearing, walking, running, shooting or driving.

Just like the vests intended for the police, the military vests are produced in all categories of ballistic resistance. The antifragment vest according to the Američan Standard STANAG 2920 shows a resistance of max. V50 = 650 m/s.

KOMFORT ALFA

KOMFORT BETA

SPECIAL PROTECTOR

T-SHIRTS

To improve the comfort in wearing of bullet-proof vests the Zbrojovka ZTM DEFEND has developed T-Shirts whose design ensures the wearer a sufficient air permeability, sweat management and to some extent it suppresses the development of the shock effect caused by the impact of a projectile.

Protective ballistic blanket

Protective ballistic blanket serves as a protection of persons and objects against the effects of soft-core projectiles shot from short firearms and against steel fragments.

The protective ballistic blanket can be used as:

1) Personal protection

to cover windows, doors in rooms or in motor vehicles, direct protection of persons or animals.

2) Protection against planted bombs

to cover suspect objects found in open or enclosed areas e.g. at the airports, stadiums, in public buildings, department stores etc. until the arrival of a bomb

disposal expert. The suspect object is fenced in with the small or big ring, the ring is

covered with a top and all it then covered with the ballistic blanket.

3) Modularsystemofinteriorprotection of persons in buildings

a) Portable protection

The protective ballistic blankets have been designed in such a way that it is possible to easily and quickly build up barriers that can be set together as required. Blankets are hung on metal stands adjustable both vertically and horizontally This protective system can be used especially in military mobile medical facilities.

b) Fixed protection

In field hospitals and other buildings where solid panels are attached to a metal structure the bullet-proof insert can be built in them directly Technical data

Dimensions: $150 \times 160 \text{ cm}$ - blanket $210 \times 20 \text{cm}$ -lowring $180 \times 40 \text{ cm}$ - high ring $50 \times 50 \text{ cm}$ -ring top

The rings and the top are used to cover suspect objects before a bomb disposal expert makes them safe. In case of an explosion, persons who are in the nearest surroundings are protected against the effects of fragments.

Ballistic protection level

CSN39 5360 3.357 Magnum, 430 ± 10 m/s US STD NU 0101.3 3A .44 Magnum, 15,55 g, 426 m/s

9 mm, 8 g, 426 m/s

STANAG 2920max. V50 = 650 m/s

Care of the ballistic blanket is simple and only consists in a possible removal of superficial impurities by shampooing and with standard detergents. The blanket cannot be washed nor dry-cleaned. The manufacturer recommends keeping the blanket, preferably in unfolded state, in a dry place at normal temperature. If necessary, e.g. in field hospitals, the blanket can be provided with removable white washable cover.
